

*Analysis diagram*

S.Morita

*Stroke order*

Please print out or copy this sheet of paper and practice writing several times as if tracing the top of the lines. You can also prepare a separate sheet of paper and practice using the following signature as an example. As an estimate, if you practice for about five minutes, you will become somewhat able to write it. Memorize the traits of the strokes while slowly getting a grasp of the feeling. The key point to becoming able to write well is to not worry about whether you are writing it nicely at the start, and gradually get a better grasp of the order and feeling of writing the signature.
